**The Small Tool with the Big Attraction!**

## Solenoid Valve Operating Magnets

The **Fridgenius** Solenoid Valve Operating Magnet is designed to convert electrically operated solenoid valves into hand-operated valves in seconds to enable service engineers to operate valves manually. The magnet greatly assists during the installation process, recovery of refrigerants, commissioning and decommissioning of plant and machinery.

### KEY FEATURES:

- Available in 3 sizes (10mm/15mm/18mm) and a wide choice of colours
- Handy pocket-size
- Easy to use and time saving
- Company branding service
- Permanent magnet moulded in ABS Plastic
- Safe design that fits all makes of solenoid valve.
